SUBJECT: low power fm radio stations

[Message]

Dear Mr. Clinton: I am a young American interested in preserving the Public Air waves. Society needs a more diverse voice on the radio and in our local communities.

I hope you will support the FCC in the creation of new low power fm radio stations. I believe it is vital for any community to have local diversity in radio and on air talent. Today with the vast creation of syndicated national radio shows like Rush Limbaugh, Oliver North and others the radio dial is all plugged up with these national geared shows which leaves little or no time for local programming on the state and local level. This I believe is causing a problem for the little people like myself and others to be heard and have our local and state issues presented over the air waves. There are

No. of Copies rec'd 0 + 1  
List ABCDE

so many vital issues facing local communities and our States that I believe local community based low power fm would give the vehicle for many of these issues to be aired. I support low power fm with all my heart and I believe the local and communitiy voices should be heard. I hope you will support low power fm and to veto any bill that comes to you which tries to cut out the voice of "We the People". Thanks for your time.
